

# Cybersecurity guidelines at Barco

## Use approved access only

Access only what you need, using Barco-approved accounts, tools, devices, and connection methods.

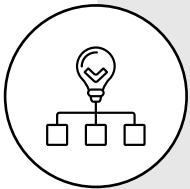

## Connect securely

Do not use unauthorized connections to the Barco network (VPNs or other).

## Protect data and credentials

Do not store credentials or data unprotected, and longer than needed. Lock devices when unattended.

## Handle data minimally and safely

Copy only the data you strictly need — avoid personal or sensitive data whenever possible.

## Report immediately

Report vulnerabilities, security incidents, or data breaches without delay.

## Clean up and comply

- Follow Barco security and confidentiality rules.
- Do not tamper with cybersecurity controls.
- Delete or return all data when work is complete.

Barco security policies always apply.  
For guidance, refer to the intranet or contact your Barco representative.
