Barco complementing some of your expert technical skills

Although you have a highly trained and experienced technical staff in your organization, you still lack some expert knowledge to successfully install and deploy a complete visualization solution. To guarantee success, you want to rely on Barco for a number of skills.

A Barco field engineer reviews the scope and design, and assists you during the installation and deployment phase. He will help you with issues varying from networking to integration, and make sure your visualization solution answers to your needs.

We solve:

- System not answering to specific needs
- High risk due to design issues
- Delay in installation due to lack of needed preparations
- Technical issues with legacy equipment
- Not fully benefiting from solution due to insufficiently trained staff
