

F400 lens holder adapter

To adapt FLDX lenses for use on F400 and FS400

The Fx400 projector series comes with an improved connection point designed for the new native 4K FLC range of lenses. The lens adapter is easily fitted to the new improved connection point and ensures your Fx400 projector series is backwards compatible with the entire FLDX range of lenses with the exact same high optical quality (no optical loss). The adapter is motion-proofed and comes with a dust protection cover for optimum performance.
