# Loki

Unmistakably Barco Residential - precision engineering and manufacturing at its finest.

- Theater & Media Room Series
- 4K UHD Resolution (3,840 x 2, 160)
- Laser Phosphor
- Up to 12,000 ANSI Lumens

Loki's alluring image quality is unmistakable, right from the very first encounter. Striking and assertive, his soul is a dual laser light engine, coupled to award-winning DLP technology and world-class optics.

#### **Professional grade optics**

By basingLoki's optical engine on a proven architecture, incorporating custom designedaspherical glass elements, and enhanced low dispersion glass lenses, imagequality is in a class of its own. Contrast is not only increased, but the detailwithin the darkest parts of the image are more visible.

### State of the art electronics

Thanks toour unique single step processing technology (SSPTM), Pulse electronics are designed toprocess 4K UHD, HDMI 2.0a, HDCP 2.2 and HDR10 signals with extremely lowlatency.

Loki usesthe very latest  $0.9^{\circ}$  DMD DLP chipset, to display flawless 4K UHD (3,840  $\times$ 2,160 px) images on screen.

### Laser light source

Outstandingimage quality requires an exceptional light source, which is why Loki uses our brand-new dual laser engine which delivers upto 12,000 ANSI lumens output.

Alongsidesignificantly improved image uniformity, lasers last longer than traditionalprojector lamps, offer great image quality consistence over their lifetime, areless fragile and offer near instant on/off performance.

## Liquid cooling

Loki hasdeparted from a pure fan based cooling system, opting instead for a liquidcooling PID regulation system. This combined with our simulation grade warp engine allows Balder to operate at any angle (free rotation), offering new possibilities when it comes to architectural integration.
