

Seamless hybrid meetings with Q-SYS and ClickShare

Bring Your Own Meeting in high-value rooms and leverage the performance of the rooms' AV systems

With Q-SYS from QSC and Barco's ClickShare wireless conferencing and presentation solutions, you have everything you need to make seamless hybrid meetings possible in your high-value meeting spaces.

Q-SYS is an cloud-managable audio, video and control platform that enables a seamless meeting experience in high-value spaces, from boardrooms and training rooms to flexible and immersive spaces. It offers integration of any modern conferencing platform via single, USB connection, allowing for easy scalability of the familiar meeting experience into high-value spaces. Q-SYS is also an open platform, enabling a greater Ecosystem of integration opportunities from Q-SYS Partners like Barco, to tailor a unique end-user experience in any space.

With Barco's ClickShare wireless conferencing and presentation solution integrated into the greater Q-SYS Ecosystem, flexibility and usability are enhanced even more. ClickShare and Q-SYS can be combined in several ways to allow for either BYOD (Bring Your Own Device) or BYOM (Bring Your Own Meeting) – hosting your meeting from your laptop with your preferred UC&C tool.

Benefits

Collaborate your way in any high-end meeting room

Choose BYOM or BYOD

Q-SYS and Barco ClickShare enable you to bring your own device into high-value meeting spaces, and benefit from Q-SYS full-featured DSP processing and software-based control engine, along with a full portfolio of native Q-SYS audio, video and control products. Three scenarios are possible:

- 1. Q-SYS and ClickShare Conference in an agnostic room:** This allows for full BYOM (use any device, any UC&C platform) in any space.
- 2. Q-SYS and ClickShare Conference in a Microsoft Teams or Zoom enabled space:** This configuration allows you to use your own device and switch to your preferred UC&C platform (BYOM). This way, you can have a Zoom call in a Teams room, for example. You can also wirelessly share content to the display and automatically connect to the AV in the room.
- 3. Q-SYS and ClickShare Present in a Microsoft Teams or Zoom Room:** This allows you to bring your own device (BYOD) and wirelessly share content to the room display in a Teams Room or Zoom Room environment, without having to force all attendees to run the VC application on their own device.

Get easy access to high-end audio & video

Q-SYS and ClickShare enable you to meet on your own terms, even in high-value meeting spaces, by using the device you are familiar with, and the conferencing software you prefer. Just connect and take advantage of the meeting room peripherals to create a more immersive experience. ClickShare also makes remote participants feel part of the meeting by stimulating engagement and offering more interaction features. You can use your personal workflow, and there's no need to switch to device mode.

Drive BYOM adoption in a simple way

Q-SYS and ClickShare make it possible to roll out and scale a true BYOM way of working throughout the enterprise more quickly and easily. This collective system is easy to use, require no training, and will result in less IT support tickets. Fully connected and integrated into your network, Q-SYS and ClickShare devices are easy to manage and monitor remotely.

Barco ClickShare Conference

Which Q-SYS and Barco ClickShare configuration is right for your meeting room?

	Showcase spaces	Immersive divisible/ Flex spaces	All hands spaces

Visit www.barco.com/qsc for more information on how to set up your meeting room with the Q-SYS and ClickShare

QSC

Q-SYS is a cloud-manageable audio, video and control platform built on the **Q-SYS OS**, a standards-based software foundation supporting native **Q-SYS Products** and the **Q-SYS Ecosystem** of endorsed Q-SYS Partner integrations and other third-party development efforts, both of which take advantage of the **Q-SYS Open** developer tool kit and open standards.

This IT-centric layered approach allows QSC to easily migrate Q-SYS to other Intel platforms as they introduce new, faster chipsets, and to other off-the-shelf hardware. Furthermore, its usage of IT standard protocols makes Q-SYS highly extensible for future IT functions and platforms.

Barco

ClickShare, the wireless presentation and conferencing hub, makes hybrid collaboration flow, in one click.

With **ClickShare Conference**, you can turn any room into a hybrid meeting room and enable true Bring Your Own Meeting (BYOM). Host calls from your laptop, use your preferred UC&C platform, and wirelessly connect to the meeting room display and AV peripherals.

With **ClickShare Present**, you can make hybrid collaboration flow in meeting rooms that already have a fixed conferencing system. Whether you are in a Microsoft Teams, Zoom or WebEx Room, you can use your own device (BYOD) and share presentations in an easy way, without having to fiddle around with wires, cables or adapters.
