# Patient notepad (JAO SW-CL-PNP)

Bedside computing software for patient communication

Improving patient communication

With Barco's bedside computing software, patients can make notes about their treatment, write down personal goals, create to-dos and much more, using the bedside terminal.

After login – which requires patient authentication – patients have immediate access to the notepad application. This also means that patients still have access to their notes when switching beds/terminals. Their notes will be deleted when the user account is closed.

Barco's Patient notepad software offers:

- Notes list and 'add note' options

- On-screen keyboard to type in notes

- Color options (four colors) to create color-based categories

Barco's bedside computing software is ideal for use on its JAO Smart Terminal range and runs on a wide variety of hardware and third party systems.

BARCO
