

SAS-500

Powerful server for use in Barco CTRL environment

- Security by design
- Redundancy option
- Enabling large-scale deployments
- Designed for 24/7 operation

The SAS-500 is the service node for Barco CTRL, delivering the core functionality of the networked visualization system. It can manage more devices than the SAS-050, making it ideal to serve large-scale Barco CTRL deployments. This device manages all hardware, and orchestrates the collaboration and visualization of the information shared between the different displays and operator workstations in a Barco CTRL system.

Managing the security features of the Barco CTRL platform, the SAS-500 is a vital component of the system.

Features and benefits

- Can handle a large amount of devices, ideal for larger Barco CTRL deployments
- Redundant PSU and disk configuration (RAID1)
- Manages complete Barco CTRL system and its cybersecurity
- Handles collaboration and sharing of information
- Mountable in a server rack
- Runs the Barco CTRL software
