

NX4s

4.66mm pixel pitch, 2,000 nits, true black surface-mounted LED tile

Extra wide viewing angle

Furthermore, the NX4s offers an extra wide viewing angle and a matte surface, for exceptional picture quality in all circumstances.

Optional 3D functionality

Full, active 3D capability is available as an option. Due to its full support for 60Hz left/right content at a 120Hz 3D frame rate, this hardware add-on causes no loss in resolution. It reduces the light output loss traditionally associated with 3D to zero. As such, it leads to an outstanding 3D effect that will immerse your audience in amazing content.

Black and bright

- Deepest level of black thanks to the use of black silicon resin instead of the traditional white epoxy
- Light trap shader design
- Phenomenal contrast ratio of 3,500:1

Seamless and lightweight

- Carbon fiber structure
- Designed in a framework - rather than a box
- Strong and light support system that is resistant to deformation along all three structural axes (x, y and z)
- Weight of only 57kg/sqm including structure and cables (21% less than ILite 6XP)

Consistent uniformity over time

- Extremely high brightness levels, thanks to the use of highly efficient LED chips and lower LED temperatures

- Slow aging process of the LED and greater degree of reliability in humid operating conditions, thanks to the use of silicon instead of epoxy resin
- Exceptional display stability and uniformity over time thanks to 'tri-color' LED calibration

Brilliant colors, breathtaking grayscales

- 16-bit processing and new "tri-color" calibration on all three colors
- New levels of color depth (281 trillion colors), uniformity, and grayscale
- Vibrant images with deep, uniform colors across the entire display surface thanks to a tight selection of LEDs and 16-bit processing power - the color triangle of the NX4s is actually wider than the HDTV standard

Get creative

- Small modular design
- Tiles can be both used as a standard integrated display or a separate display for creative designs.
- Possible to use in any shape or form (when combined with Barco Director Toolset)

Remove the tools, improve the serviceability

- No tools or cables needed to set up and secure an NX4 LED wall or take it apart for service
- Easy access to every module, the control unit and interface boards
- Easy removal and replacement of shaders when damaged

Product specifications**NX4S****General specifications**

Pixel pitch	4.66 mm
Brightness	2,000 nits
LED configuration	3-in-1 black SMD
Pixel density	45,918/sqm 4,271/sqf 10,368/tile (96x108)
Viewing angle	H: 120° V: +60°/-60° (@ 50% brightness)
Contrast ratio	3,500:1
Lifetime	60,000 hours @ 75% brightness
Power consumption	244 W/tile (max) 109W average
Tile size (WxHxD) in mm	448mm (17.6") x 504mm (19.8") x 210 mm (8.27") (rental) 448mm (17.6") x 504mm (19.8") x 228.6mm (9") (fixed)
Weight / Tile	12.9 kg (28.4 lbs) (rental) 13.8kg (30.3 lbs) (fixed)
IP rating	Indoor use only
Processing	16 bit/color
Colors	281 trillion
Refresh rate	3,200Hz
3D ready (optional)	yes
Max. stacking	Max. 12 tiles high
Max. hanging	Max. 15 tiles high
Interfaces	4x HDMI link 1x USB (diagnostic)
Serviceability	Front and back (tools required for front)
Source compatibility	CVBS, YC, YUV, RGB, DVI (Single and Dual link , up to 2048x1536) SDI, HD-SDI, Dual link HD-SDI
Operatable digitizer	DX-100, DX-700 (with NNI output card)
Certifications	CE class A, TUV, FCC Class A, ETL, Cebec, RoHS
3D capability	Yes Required install R9801024B1
