

Cineo10

full HD DLP projector for small preview suites, VFX, and DI applications

The cineo10 is compatible with HDMI 1.3a and it is accompanied by a DVI connector that features the same HDMI compatibility, but has added structural support for heavy gauge cables. Both digital inputs feature our unique digital DPEq Digital Pixel Equalization, thus can be used with up to 30m / 100ft copper digital cables without signal loss at 1080p resolution.

cineo10 supports SMPTC, REC709 and EBU colour gamut. Like all other models in the cineo range, the cineo10 features our proprietary RealColor colour management suite, which enables perfectly calibrated colours for both primary and secondary colours.
