

MDSC-1119

19-inch surgical color LCD display

- **First-generation surgical display**
- **For perfect hand-eye coordination**
- **Designed for patient safety**

Unsurpassed image quality

Incorporating the latest LCD technology, the MDSC-1119 features high brightness, making it ideal for the OR's high ambient light conditions. Furthermore, the MDSC-1119's high contrast ratio, color depth and wide viewing angle maximize image accuracy. Calibration of color, luminance and signal balance add to the optimal and unsurpassed image quality.

- Flexibility and expandability: the MDSC-1119's video bus architecture and modular slot concept allow the display to be configured to specific OR video connectivity requirements. Furthermore, it readily supports new and future video formats, such as high-definition digital video.
- Versatile multi-modality imaging: the MDSC-1119 is a versatile multi-modality display for endoscopic cameras, room and boom cameras, ultrasound, cardiology, PACS, anesthesiology and patient information.
- Dual channel Picture-in-Picture or Picture-by-Picture views of images from multiple input signals give surgeons the required views, allowing them to make more informed decisions.
- Artifact-free, real-time viewing: the MDSC-1119 surgical display offers the fastest image transmission and broadcast quality
