

# SLite HD Rental Frame

New SLite Frame for bigger sized LED walls and/or use in harsh environments.

Barco's Slite Heavy Duty rental structure has been purpose built for bigger sized LED walls as well as applications in harsh environments. It is possible to stack the new Slite Heavy Duty rental frames 12 tiles high (instead of 9), and up to 15 tiles (instead of 8) when trussed.

The Slite Heavy Duty Rental Frame offers following additional features:

- Big, rugged pre-positioning cones for ease of setup in any environment
- Rugged horizontal and vertical attachment & safety mechanism; no need for tooling to build up wall
- Seam conserter installed
- Compatibility with Olite single & dual truss, foot, stackers and flight case

The existing Slite rental frame will remain available, in addition to the new Slite Heavy Duty Rental frame. Depending on your application and the size of the LED wall, you are able to select the most suitable.
