The DCP-0810 is a single-piece outdoor LED advertising display system for digital out-of-home media. Thanks to Barco proprietary color signature technology, the DCP-0810 delivers an excellent balance between brightness and contrast. In this way it guarantees exact reproduction of brand colors at all times.

Environmentally friendly

As an environmentally friendly display it ensures lower power consumption and longer lifetime. The DCP-0810 features built-in redundancies such as image failover, power supply redundancy and multiple sensors. It is also equipped with extensive remote management and control capabilities.

For branding and advertising

The DCP-0810 provides powerful imagery in combination with 24/7 reliability and a low cost of ownership. With less power consumption and a lighter weight than similar products, the DCP-0810 is a perfect fit for advertising and branding applications.
