

NSL control room bundles

Bundles containing a complete control room, including LCD video wall, controller, software, cables and wall mounts

With the Control Room in a Box concept, Barco makes the configuration of a small control room with a LCD video wall easy, by delivering all needed components in a bundle. In this way, we can provide the most cost-effective and flexible solution.

Wide range of available sizes

A Control Room in a Box consists of a LCD tiled video wall from the NSL series, a controller, and the needed cables, software and wall mounts. The near-seamless NSL LCD screens were developed especially for Customers can choose between 46" and 55" screens, and a 2x2, 3x2 or 4x2 configuration, offering the needed flexibility in terms of screen width.

Choose the right controller

Furthermore, by offering three different TransForm controller configurations it is also possible to choose the bundle in terms of the application. In this way, Control Room in a Box becomes the
