

Instant VideoWall

Complete video wall solution in one package

A tiled LCD video wall offers the comfort of a very large display, in many possible applications. In order to ease the configuration task for you, Barco offers packages containing all the necessary equipment to get your video wall operational in no time. Available in a variety of configurations, the packages include the displays and needed mounting equipment. Optionally these packages can be extended by a wall controller that fits your needs.

The video wall that best suits your needs

For this package, Barco selected the 55" OverView HVD5521 and KVD5521 tiled LCD video wall panels. With their extremely thin gap, they form a great looking, bright video wall in 2x2, 3x2 or 4x2 setup. The Instant VideoWall is also available in combination with the OBLX or OBPX series free-standing structure, enabling you to position the video wall anywhere, without the need for wall support.

Choose your controller (optional)

To show web content, process applications, MS-Office documents, or simply display your laptop on the video wall, Barco's series of controllers are designed to meet your requirements. Choose the needed number of DVI and video inputs, ClickShare systems, the display & content management, and dashboard capabilities, and from our TransForm family of controllers we will propose the best suited configuration.

Standard:

- Four, six or eight panels
