XDL-4K75

75,000 lumens, 4K, 3-chip DLP RGB laser large venue projector

- Stunning experiences thanks to high-brightness 4K images in REC 2020 colors
- Low total cost of ownership thanks to laser light source and brightness levels
- Reduced installation time through zero alignment

75,000 lumens – from just one projector. Imagine what you can do with that. We're talking bright, real bright. With REC. 2020 colors that are just extraordinary. For bigger screens, more pixels, more impact. Plus incredible RGB laser performance, signal flexibility up to a comfortable 120 Hz, and no alignment.

Images that speak

Offer visitors crisper, more realistic contrast for greater impact with images of breathtaking depth thanks to their native 4K resolution up to 120Hz. And when you need it, use brightness up to a massive 75K lumens – the brightest on the planet.

Cost-saving design

Want to drive down your cost-per-lumen? A single XDL is the answer. Their RGB laser light source slash image flicker and lamp-related costs and maintenance (such as lamp replacements). Compared to xenon projectors, the XDLs also consume 40% less power - and you can re-use your existing Barco XLD+ lenses. Truly reliable, expect a lifetime of up to 20,000 hours with minimum downtime.

Easy to set up and use

Installing one projector is always easier than having to install several. It means less equipment to transport and set up – and fewer possible points of failure. XDL speeds up installation by reducing alignment time. The projectors provide an exceptional lens shift of up to 100% so you can install them anywhere you like. You can also easily match images to your projection surface using on-board real-time warping and blending.
