- 4K UHD resolution

- Durable and robust for 24/7 operation

- High brightness

- Long lifetime (up to 60,000 hours)

The F70-4K8 is a laser phosphor projector with native WQXGA and up to 4K UHD resolution. The F70 series answers to the ProAV market's specific requirements - including high robustness, longer lifetime, and laser-sharp image quality. Projectors that do not meet these demands don't last long or might require frequent and expensive maintenance.

Thanks to its rugged design Barco's F70 is motion platform capable, making it the perfect choice for theme parks, dark rides and the most demanding fixed installations. With a lifetime of up to 60,000 hours (depending on the mode of operation), the F70 is one of the most durable projectors on the market and is ready for service in the most demanding environments.

Designed for 24/7 use
The F70 is designed for performance and reliability. Capable of running in any orientation, the F70 projectors offer more installation flexibility. All of Barco's F-series projectors feature the same high-resolution FLD and FLD+ lenses so that you can reuse your lenses.

Brighter, better
With brightness levels of 7,500 lumens, the F70-4K8 is one of the brightest single-chip DLP projectors on the market. With the Constant Light Output (CLOTM) functionality, the projector produces constant brightness and color over a long period of time.
