

5 Ways ClickShare Conference can optimize your meeting rooms

Grow your business and get the best ROI on your meeting room solutions.

1. Saves time in meetings

In a single-platform room, it takes 7 minutes to set up a meeting. With ClickShare Conference, it's just one-click join. Plug in the Conferencing Button, and you're connected in just 7 seconds.

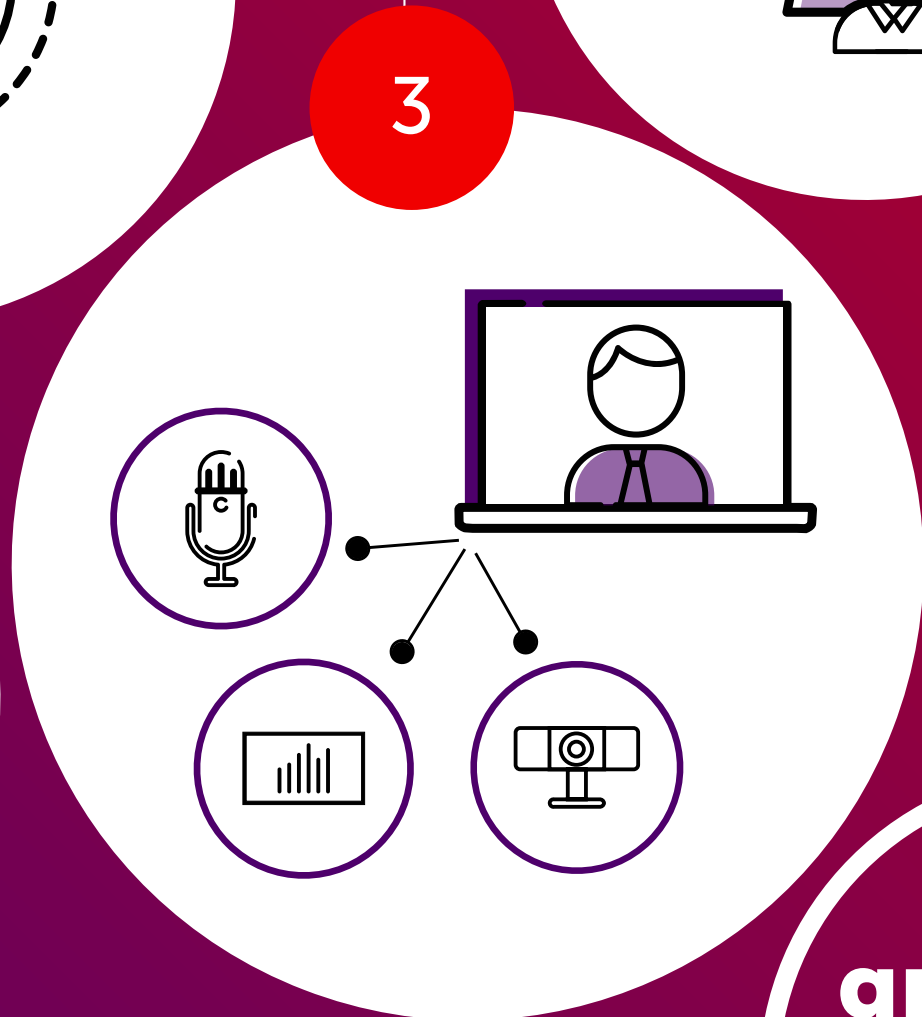

2. Room flexibility with meeting solution

In a single-platform room, you're locked into one UC platform. ClickShare Conference welcomes all UC platforms, enabling flexibility and future-proofing.

3. Peripherals get put to use

In a single-platform room, it's tough to connect peripherals (e.g., camera, display, sound bar). ClickShare Conference automatically connects the room technology, putting the peripherals (and your money) to good use.

4. Inclusive of remote participants

The single-platform room experience lacks for workers on the far end, who deserve a great meeting experience too. With ClickShare Conference, remote workers can see and experience the same content that in-room users do.

5. People love to use meeting rooms again

If the room is too complicated, like in a single-platform room, people won't use it. With ClickShare Conference, rest assured people will love using meeting rooms again.
