

Health team display (JAO SW-CL-HTE)

Bedside computing software for patient information

Improving patient communication

With Barco's bedside computing software, patients can see the members of their healthcare team on the user interface of the bedside terminal. This significantly improves communication between patients and caregivers, resulting in better quality of care.

Barco's Health team display software offers:

- Overview of care staff members via the "Service menu" button
- Management options, e.g. assignment of staff members to single terminals or whole wards using the Management Console (MMC)

Barco's bedside computing software is ideal for use on its JAO Smart Terminal range and runs on a wide variety of hardware and third party systems.
