

# I-Space

Multi-walled stereoscopic environment

Barco's I-Space is a multi-sided, cubic immersive environment that surrounds the user completely with virtual imagery. It consists of three to six walls, according to the user's requirements.

Barco designs your I-Space fully according to your specific demands. It can be a fixed or transportable installation with rigid or flexible screens, with active or passive 3D stereo, or both.

## Special features

- in-house designed, optimized screens and mechanical structures
- several projection technologies available
- optional integrated "six degrees of freedom" (6DoF) tracking
- rear-projection screens (rigid or flexible)
- front or rear-projected floor screen
