

Wall recording

Training - Monitoring - After Action review

- Record any video standard content from wall or desktop at full resolution
- Synchronous recording/playback of up to 50 simultaneous streams
- Playback on the original wall or on any remote desktop
- Visually lossless (sub 2 frames) and well accepted for replay

Barco's Wall recording solution was developed to support training, monitoring and After Action reviewing. It records any video standard content from the wall or a desktop at full resolution. Up to 50 simultaneous streams can be synchronously recorded and played back. Playback can either occur on the original wall, or on any remote desktop with visually lossless accuracy.

Main applications

- Education purposes: recorded training scenarios
- Event analysis and After Action Review
- Compliance through visual documentation and archiving of key events
